Projects done

Todo-List in React

Todo-List app is created by using React JS. Todo - List project is an application specially built to keep track of errands of tasks that need to be done. This app will be like a task keeper where the user would be able to enter the tasks that they need to do. Once they are done with the task , they can delete the task . They can also edit the task from the list.

Weather App in React

Weather app is created by using "OpenWeatherMap" API and React JS. This is a small project, creating a weather widget which can be implemented on a website using the "OpenWeatherMap.org" API in order to fetch weather condition like temperature, humidity, wind speed etc. based on the user input. I used different images like rain, sun, drizzle etc. It shows rain image when its raining based on the user input.

Cakes Shop in React

Cakes Restaurant is created by using React JS. It is a small website for an online buying for cakes. I added some beautiful images of cakes . Nowadays , there is no celebration without cake cutting. Here, i have given the images of chefs also who are preparing cakes.

Calculator in JavaScript

Calculator is created by using HTML 5, CSS3 , JavaScript. It is a small application built for calculations. By using this app , we can calculate numbers by adding, subtracting, multiplying , divide etc.

Age Calculator in JavaScript

Age Calculator is created by using HTML 5, CSS3 , JavaScript. It is a small application specially built for age calculations. By using this app , we can calculate age by giving date of birth of the user. After giving input , it shows the age in years, months, days, minutes and in seconds also.

Contact Book in JavaScript

Contact Book is created by using HTML 5, CSS 3 , JavaScript. It is a small application built to save contact by giving their name and number. we can also search contact number by entering their name.
